

Emergency Procedures

TOW

If you require a tow or other assistance from the worksite staff at any time on this tip site, you as the truck driver must:

1. Stay in your cab.
2. Request for assistance on UHF CH 33.
3. Do not exit your cab unless you are in immediate danger by remaining in your cab.

Tipsite evacuation

In the event of a Tipsite evacuation you will hear a continuous alarm on UHF CH 33. As the truck driver you must:

1. Stay in your truck, park safely out of the way.
2. Signal to a nearby operator who will give you a ride in a work ute down to the assembly point.
3. Follow all instructions given by Dirtworks' staff.

Tipsite Information Booklet

It is a requirement that you read and understand the Hazard Board (located at the front of the weighbridge) for the relevant **risks** and **controls** for this Tipsite.

TIPPING PROCEDURE

1. Wait your turn in the queue
2. Reverse onto the tip block
3. Tip your load into the hole
4. Lower your hoist
5. Pull forward from the tip block
6. Clean trips in pull off bay

DO

- ✓ Watch and listen to the spotter/operator for instructions at all times.
- ✓ Always have your hand on the hoist lever while tipping.
- ✓ Abide by any instructions given by the tip operator.

DO NOT

- × Leave your cab while tipping.
- × Take your eyes off the spotter/operator.
- × Talk on your phone or be distracted in any other way.
- × Tip if you feel unsafe or are on uneven ground.

Please check material Type with operator on every load.
